

## Unveiling of Bushy Lake Restoration & Education Project

**Please join us on September 23rd for this important event & guided walks!**

Bushy Lake sits between the American River and Cal Expo. Despite being damaged in wildfires, the area is home to a number of native species, including western pond turtles, denning river otters, and many different kinds of birds. Through a contract with the Sacramento County Parks Department, Sacramento State professor Michelle Stevens and the University's Department of Environmental Studies has initiated the Bushy Lake Restoration and Environmental Education Project. The wide-ranging project includes the restoration of both wetland and riparian habitat, ecological monitoring, and an important environmental education program.

The partnership has produced and will make available to the public leaflets, brochures and trail guides that focus on the unique attributes of Bushy Lake and the Lower American River. The leaflets will allow teachers, citizen scientists, and outdoor enthusiasts the ability to see and better understand Sacramento's natural resources. Topics include:

Restoration Ecology & Fire Resilient Landscapes  
Special Animals  
Wetlands  
Climate Change & Carbon Sequestration in Soils

Ethnobotany  
Water Education  
Aquatic Life  
Water Budget

### Unveiling Event Details

**Who:** Public officials, Sacramento State faculty and students, American River Parkway stakeholders, environmental educators and nature lovers

**What:** Unveiling of education material and environmental education expo

**When:** Friday September 23, 2016, 9:00 am press event, guided tours all morning until noon

**Where:** Bushy Lake, located in the American River Parkway, behind Cal Expo Gate 12, enter at the end of Ethan Way

**RSVP:** [cflowers@csus.edu](mailto:cflowers@csus.edu) or (916) 454-9067

Representatives from a number of other environmental education and American River conservation organizations will also be on hand to share with the public their efforts to protect and preserve the Lower American River. Light refreshments will be provided.

Environmental groups are invited to set up a booth to showcase their commitment to environmental stewardship. Please contact Christine Flowers ([cflowers@csus.edu](mailto:cflowers@csus.edu) or 916-454-9067) by September 14th for more information and to reserve space.
